Research Summary

- I am interested in everything to do with videos! Time, video-language, video-audio, … etc.
- Example work: Understanding the order of time in video and language (see Fig 1)

|	
A. Dog runs away *before* it brings a ball to the man	**B.** The dog brings a a ball to the man *before* it runs away
C. The baby eats food *after* it looks into the camera	**D.** The baby looks into the camera *after* it eats food

Figure 1. Can you match the correct video-text pairs? Understanding the time order of events in both video and language is necessary to be able to solve this task. See footnote on next page for answers.
